

A Farm Demonstrator For Utah County

People of This County Should Get
Busy and Secure Part of State
and National Appropriations
for This Purpose.

Dr. Robert J. Evans came in from Millard county Thursday for a brief visit with his parents, Mr. and Mrs. A. J. Evans.

Dr. Evans is in charge of all the county and district farm demonstrators in Utah. He is working under the joint supervision of the general and state governments, the U. S. Agricultural Department and the State Agricultural College.

An appropriation of several thousand dollars has been made by congress and a like amount by the state of Utah to pay for the employment of agricultural experts to work among the farmers in the several counties. The counties in which the work is done must help to meet the expenses jointly with the state and national governments.

These experts are called county farm demonstrators. They visit with the farmers, and besides imparting of their own information, they study the reasons for success among the successful farmers and communicate this information to the less successful ones. As they visit from farm to farm gathering and dispensing information the work of the successful farmers acts as a leavening of the whole county. They also hold farmers' meetings and help to form farmers' organizations, and thus bring the farmers in closer touch with each other.

Several of the counties have already taken advantage of this assistance from the state and nation and Dr. Evans reports that while the work is less than a year old, it has been productive of much good and more counties are asking that they be given an opportunity for co-operation. However, the first appropriation being limited was soon exhausted, so that but a part of the county applications could be accommodated.

The doctor draws attention to the fact that the Lever bill providing for additional appropriations was this week passed through one branch of congress, and undoubtedly will pass the other branch. It provides sufficient funds to employ six more demonstrators in Utah. The rule followed in the past by the agricultural colleges has been to fill the applications in the order that they come in from the different districts. Already two additional counties have their applications in, leaving but four more available.

Utah county should at once make application for one of the four vacancies. It is the richest agricultural county in the state and produces the greatest variety of crops of any county in the state. There is no place where a demonstrator could do more effective work. Some men last year made \$500 per acre from their fruit, others operated at a loss. Some men produced a similar profit from growing celery, while similar soil in other places were yielding crops of but a tenth as valuable. Some dry farmers are harvesting wheat that yields fifty bushels per acre; others fail to harvest any. Some second stands of alfalfa are harvested before second crop has hardly commenced to grow in other fields. Some orchardists produce a hundred dollars worth of beans between their trees, while others get no revenue at all while their trees are coming into bearing, and all this variety of conditions can be found in one little county where the conditions all over are practically the same. In the stock growing line some dairy cows are producing a big profit while others produce a loss to the owners, and some rows of beef cattle get 25 per cent more per head on an average than do their neighbors.

We know of no more profitable way in which the county could expend say \$1,200 per year than to get in its application at once for the privilege of co-operating on farm demonstration. Every farmers' organization and commercial club in the county should send delegates to the next meeting of the county commissioners and ask them to take the necessary steps before the new appropriation has been exhausted.

Resort Company to Be Organized

Saratoga Springs With 100 Acres to
Form Basis for Big Pleasure
Resort Corporation.

The new owners of the Saratoga Springs will segregate one hundred acres of the ranch and with the resort proper will form the base for a separate corporation. The company will be organized in the near future and intends making the Saratoga Springs second to none of the other resorts in the state.

The new owners have also segregated a part of the lake frontage, which will be cut up into lots and sold for the purpose of erecting summer cottages thereon. The seventy-five lots that have been put on the market have practically all been spoken for by Salt Lake parties, but a few of them will be reserved for Utah county friends, who Mr. Austin feels should be taken care of.

SUPERVISOR ANDERSON REMEMBERED

The public school teachers took their district supervisor, A. B. Anderson, by surprise Thursday morning. As he came into his office just before the opening exercises the teachers, with a neatly worded speech, presented him with a beautiful gold signet ring. Mr. Anderson answered with a few feeling remarks, expressing his deep appreciation and his pleasure of the close association with them during the past number of years.

JAPANESE OPERA AN ARTISTIC SUCCESS

The operetta, "A Japanese Girl," presented by the young ladies of the Second Ward, was all that they advertised it. It was tuneful, entertaining and the parts were well rendered. Miss Odessa Allred, the "Japanese Girl" in the play, pleased her friends immensely and revealed a voice sweet and musical. The other parts were all well rendered, both the songs and dances showing long and careful training. The Japanese garden was well pictured and more than one who knows the stage material could well expect.

There were but few people on the roosts, but the chairs were well filled. Imported stock of seed potatoes at People's Co-op. 16-1t

JAP DOCTOR ARRESTED.

George F. Kota, the Japanese doctor who has been practicing medicine in Lehi and the surrounding towns, was arrested by Sheriff East Thursday and taken over to Provo, where he will have to answer to the charge of practicing medicine without a license.

The Jap is a little inoffensive sort of a man, and it is reported that he has built up quite a clientele by using herbs and massage treatment for rheumatism and similar ailments, in which he is reported to have been remarkably successful.

TELEPHONE INVESTIGATION

In the countless investigations and appraisements of telephone property in different parts of the country, there has been a striking decrease of uniformity in the values found in excess of those carried on the telephone books. In Boston, for instance, the existing plant could not be duplicated for 35 per cent more than its present book value, according to commission reports. To duplicate the telephone in New York City alone would cost a million dollars more than its present book value, and so on among the great cities of the country.—Cleveland (Ohio) Finance, Oct. 11, 1913.

Grandma Never Let Her Hair Get Gray

Kept Her Locks Dark, Thick, Glossy,
With Sage Tea and Sulphur.

When you darken your hair with Sage Tea and Sulphur, no one can tell, because it's done so naturally, so evenly. Preparing this mixture, though, at home is messy and troublesome. For 50 cents you can buy at any drug store the ready-to-use tonic called "Wyeth's Sage and Sulphur Hair Remedy." You just dampen a sponge or soft brush with it and draw this through your hair, taking one small strand at a time. By morning all gray hair disappears, and after another application or two, your hair becomes beautifully darkened, glossy and luxuriant. You will also discover dandruff is gone and hair has stopped falling.

Gray, faded hair, though no disgrace, is a sign of old age, and as we all desire a youthful and attractive appearance, get busy at once with Wyeth's Sage and Sulphur and look years younger.
